VIDYASAGAR UNIVERSITY
MBA::SECOND SEMESTER
(Effective from 2018-19)
Paper Code: MBA- 204
Subject: Research Methodology

Full Marks: 50

No. of Classes: 20 Hours

2 Credits

Course Objective

The aim of the course is to provide students with an introduction to research methods and report writing. Upon successful completion of the course, students are expected to develop understanding on various kinds of research, objectives of doing research, research process, research designs and sampling and to have basic knowledge on qualitative research techniques. They will gain adequate knowledge on measurement & scaling techniques as well as the quantitative data analysis and to have basic awareness of data analysis-and hypothesis testing procedures.

Course Contents

1. **Introduction:** Meaning, Objectives, Types of Research: Exploratory Studies, Descriptive Studies, Causal Studies, Action Research, Conclusive Research, Research Methods and Methodology, Steps of Research Methodology, Quantitative & Qualitative Methods.
2. **Scaling:** Types of Scale, Attitude Measurement, Parametric and Non- Parametric Test (One Sample Sign Test, Wilcoxon Signed Rank Test, Mann-Whitney U Test.

3. **Sampling:** Sample and Sampling, Need, Types, Determination of Sample Size, Reliability, Validity, Sampling Theory and Sampling Distributions, Sampling Errors.
4. **Hypothesis:** Normal Distribution, Test of Hypothesis, Types of Error in Testing of Hypothesis, Large and Small Sample Tests, t, Z, F and Chi-square Tests, Analysis and Interpretation of Data.
5. **Report Writing:** Steps in Report Writing, Layout and Types of Report Presentation.
6. **Methods of Data Collection:** Primary Data Collection Methods: Observation, Interview, Case Studies, Documentary Sources, Questionnaire Methods, Questionnaire Designing using Scaling Technique, Secondary Data Collection Methods: Classification of Secondary Data, Benefits & Drawbacks of Secondary Data, Evaluation of Secondary Data.
7. **Data Analysis & Interpretation:** Multivariate Analysis: Basic Concepts and Types of Multivariate Techniques, Factor Analysis, Multiple Regression Analysis, Time Series & Forecasting.

VIDYASAGAR UNIVERSITY
MBA::SECOND SEMESTER
 (Effective from 2018-19)
Paper Code: MBA- 206

Subject: Production Management

Full Marks: 100

No. of Classes: 40 Hours

4 Credits

Course Objective

The aim of the course is to discuss the functions of the production manager, the process of selecting an appropriate location for a manufacturing unit, and appropriate placement of men, machinery and equipment within the manufacturing unit. The course also covers the aspects of procuring the right quantity of material and at the right time for use in production, efficient storage of material, and the appropriate placement of machines to achieve the desired production levels.

Course Contents

1. **Introduction:** Concept and Meaning, Role and Scope of Production Management, Nature and Types of Production.
2. **Facility Location:** Plant Location, Choice and selection, Plant Layout, Types of Layout, Layout Planning and Analysis, Criteria for a Good layout.
3. **Production Planning and Control:** Demand Forecasting for Production, Production Process Analysis, Determinants of Products Mix, Production Scheduling.
4. **Work Measurement:** Work Sampling, Time Study, Method Study, Motion Study.

5. **Statistical Quality Control**: Concept and Meaning of Quality Control, Objectives, Statically Quality Control, Control Charts.
6. **Total Quality Management (TQM)**: Concept, Features, Objectives, Kaizen 5-S Practice of TQM, Quality Control by Juran, Quality Circles.
7. **Process Control, CAD, CAM, & CIM**

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2020-21)

Major Specialization Groups

Specialization: MBA: Business Data Analytics & Data Science

Paper Code: MBA- 301 for Minor /MBA- 305 for Major

Subject: Introduction to Analytics

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- **To understand about analytics**
- **To be able to differentiate between analysis and analytics**
- **To learn about descriptive and inferential statistics**
- **To know about the different types of Analytics**
- **To know about basic programming logic and technique**
- **To have an understanding of object orientation and basic programming in C++ and Java**
- **To know about the concept of data base**
- **To be able to fetch data through generating query from database**

Course Contents

1. **Introduction:** Introduction to Data Science, Role of a Data Scientist, Big Data, Types of Data, Data Formats
2. **Descriptive Statistics:** Measures of Central Tendency, Measures of Variability, Variance and Standard Deviation, Skewness & Kurtosis
3. **Inferential Statistics:** Sampling Distribution and Estimation, Correlation & regression Analysis, Hypothesis Testing (Parametric and Non- Parametric), Significance in Data Science

4. **Types of Analytics:** Descriptive Analytics, Diagnostic Analytics, Prescriptive Analytics, Exploratory Analytics, Predictive Analytics, Mechanistic Analytics, Casual Analytics, Inferential Analytics
5. **Programming Fundamentals :** Developing programming logic and technique through algorithm and flow charts, Concepts of object orientation and programming in C++ and Java
6. **Data Base Management System:** Concepts of Data Base Management, Relational Data Base Management System, Data warehousing, Data fetching through query generation.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2020-21)

Major Specialization Groups

Specialization: MBA: Business Data Analytics & Data Science

Paper Code: MBA- 302 for Minor /MBA- 306 for Major

Subject: Fundamentals of Data Analytics

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- **To be able to understand the data types, object orientation, control structure and functions used in Python**
- **To understand and use the programming language Python**
- **To be able to understand the use of different data structures in programming language R**
- **In-depth study of programming languages- R and Python**
- **Understand predictive modeling using R**
- **Understand the concept of Machine Learning**

Course Contents

1. **Programming with Python:** Data types, Control Structures and Functions, Modules, Object Oriented programming, File handling
2. **Advanced Programming Techniques with Python:** Procedural programming, Debugging, Testing & Profiling, Processes & Threading, Networking, Regular expressions
3. **Programming with R:** Introduction, Manipulation of numbers and vectors, Objects and their attributes, Array and matrices, Lists and data frames, Reading data from files, Grouping, loops and conditional functions
4. **Predictive Modeling With R:** Linear Regression, Logistic Regression, Support Vector Machine, Case Study, Advanced Regression, Tree Model, Time Series, Neural Networks, Model Selection
5. **Fundamentals of Machine learning:** In depth study of Linear regression, Assignment: Linear Regression, In depth study of Logistic Regression, Clustering, in depth learning of Support vector machine, Principal Component Analysis, HR Analytics Case Study,
6. **Advanced concepts of Machine Learning:** Advanced Regression, Tree Model, Time Series, Model Selection, Practical Considerations, Telecom Churn Case Study.

Major Specialization Groups
Specialization: MBA: Business Data Analytics & Data Science
Paper Code: MBA- 307 for Major
Subject : Social Media Analytics
Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- **To identify the effectiveness of social media in identifying target audience**

- To know about the key features of social media analytics
- To know about the scope of social media analytics in industries
- To learn tools used for social media analytics
- To be able to measure campaign traffic

Course Contents

1. **Key features of social media analytics:** Effectiveness of Social Media, Identifying target audience, Analysis of the level of outreach and reception of posts.
2. **Target Audience:** Understanding the target audience, Targeted messaging & advertising, Social Media Filtrations.
3. **Social Media Analytics for Industries:** Scope of Social Media Analytics in industries, Benefits of Social Media Analytics in industries, Tools for social media analytics
4. **Google Analytics:** Measuring campaign traffic, Website conversion & user activity, Generating audience report, Generating custom reports.
5. **Measuring & Analyzing Content:** Importance of Analysis; Identifying Successes and Failures, Tracking, Measuring and Managing the Data, Tools for Success in Content Analysis.
6. **Measuring ROI:** The Concept of ROI, Turning Information into Actionable Insights, Regulation of investment & profit, Feasibility Study, Cost & Benefit Analysis, Measuring ROI

VIDYASAGAR UNIVERSITY
MBA: THIRD SEMESTER
(Effective from 2020-21)
Major Specialization Groups
Specialization: MBA: Business Data Analytics & Data Science
Paper Code: MBA- 308 for Major
Subject : Analytics Process
Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- **To understand the concepts of artificial intelligence**
- **To understand propositional and predicate logic**
- **To understand thoroughly the programming languages used in AI**
- **To handle inconsistent and incomplete knowledge through fuzzy logic**
- **To know about the application area of artificial intelligence**
- **To understand single and multi layer neural networks**

Course Contents

1. **Introduction:** Concepts & definitions of AI, Brief history of AI, AI and related fields, Characteristics and underlying assumption of AI, Turing test, Uninformed searches, Informed searches: generate and test, Hill-climbing, A* algorithm, Problem reduction, Constraint satisfaction
2. **Propositional & Predicate Logic:** Syntax and semantics for prepositional logic, Syntax & semantics of First Order Predicate Logic (FOPL), Properties of well-formed formula (wff), Conversion to clausal form, Inference rules, The resolution principle, Non-deductive inference methods
3. **AI Programming Languages:** Introduction to LISP, Syntax and Numeric Functions, Basic List Manipulation Functions in LISP Functions, Predicates and Conditionals, Input, Output, and Local Variables, Iteration and Recursion, Property Lists and Arrays, PROLOG: List, Operators, Arithmetic, Cut & Fail, Backtracking
4. **Handling Inconsistent and Incomplete Knowledge:** Truth Maintenance Systems, Reasoning Techniques, Concept of Uncertainty, Bayes' Theorem, Certainty Factors and Rule-Based Systems, Bayesian Networks, Dempster-Shafter Theory, Fuzzy Sets, Fuzzy Operators & Arithmetic, Membership Functions, Fuzzy Relations
5. **Applications of Artificial Intelligence:** Introduction and Concept of Planning, Representing and Using Domain Knowledge, Expert System Shells, Knowledge Acquisition, Agents and environments, Rationality and other performance measures, Nature of environments
6. **Neural Networks:** Neural models and basic learning rules, Single layer and multi layer neural networks, Associative memory and image restoration based on associative memory, Gesture Recognition

VIDYASAGAR UNIVERSITY
MBA: THIRD SEMESTER
Major Specialization Groups
Specialization: Banking and Strategic Finance
Paper Code: MBA- 308 for Major
Subject: Capital Markets

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives:

- To understand the Capital Market trading operations
- To know about the eligibility criteria for seeking membership
- To understand the Trading mechanism
- To understand the clearing, settlement and risk management processes.
- To learn the other important regulatory aspects
- To understand the basic Valuation concepts

Course Contents

8. **Overview of The Indian Securities Market:** Market Segments, Indicators of Securities Market, Products and Participants, Market Segments and Their Products, Reforms in Indian Securities Markets.
9. **Trading Membership:** Stock Brokers, NSE Membership, Surrender of Trading Membership, Suspension and Expulsion of Membership, Declaration of Defaulter, Authorized Persons, Sub Brokers, Brokers – Client Relations, Sub Brokers – Client Relations, Investor Service Cell, Arbitration, Code of Advertisement.
10. **Trading:** Introduction, NEAT, Market Types, Trading Systems Users Hierarchy, Local Database, Market Phases, Market Phases, Logging On, Log OFF/Exit from the Application, NEAT Screen, Invoking an Inquiry Screen, Order Management, Trade Management, Auction, Limited Physical Market, Block Trading Session, Retail Debt market, Internet Broking, Co location, Wireless Application Protocol.
11. **Clearing, Settlement, and Risk Management:** Introduction, Key Terminologies used in Clearing and Settlement Process, Transaction Cycle, Settlement Agencies, Clearing and Settlement Process, Securities

and Funds Settlement, Shortages Handling, Risks in Settlement, Risk Management, Data and Report Downloads.

12. **Legal Framework:** SEBI (Intermediaries) Regulations, 2008, SEBI (Prohibition of Insider Trading) Regulations, 1992, SEBI (Prohibition of Fraudulent and Unfair Trade Practices relating to securities market) Regulations, 2003, The Depositories Act, 1996, Indian Contract Act, 1872, Income Tax Act, 1961
13. **Fundamental Valuation Concepts:** Time Value of Money, Understanding Financial Statements.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Major Specialization Groups

Specialization: Operations and Systems

Paper Code: MBA - 301 for Minor MBA - 305 for Major

Subject: Decision Science and Software Engineering

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

This course objective is to acquaint students with Operations research techniques for effective decisions-making, Students will apply data science concepts and methods to solve problems in real-world contexts. It will also provide a professionally guided education in software engineering that prepares graduates for transition into a broad range of career options: industry, government, computing graduate program, and professional education.

Describe software engineering layered technology and Process frame work. 3. A general understanding of software process models such as the waterfall and evolutionary models. 4. Understanding of software requirements and the SRS documents. 5. Understanding of the role of project management including planning, scheduling, risk management, etc. 6. Describe data models, object models, context models and behavioural models.

Course Contents

1. **Introduction:** Definitions, Characteristics of Software, Software Engineering vs. Other Engineering Disciplines, Software Myths, Software Life Cycle Models, Selection of Software Process Models.
2. **Requirement Analysis:** Prototyping, Specification, Analysis Modeling.
3. **Software Design:** Software Design, Abstraction, Modularity, Software Architecture, Effective Modular Design, Cohesion and Coupling, Architectural Design and Procedural Design, Data Flow Oriented Design.
4. **User Interface Design:** User Interface Design, Human Factors, Human Computer Interaction, Human, Computer Interface Design, Interface Design, Interface Standards, Programming Languages and Coding, Language Hours, Code Documentation, Code Efficiency, Software Configuration Management.

5. **Programming Standards:** Need for Structured Programming, Coding Standards, Maintainability of Programs.
6. **Coding: Structured Programming:** Information Hiding, Documentation Verification.
7. **Testing Techniques:** Software Testing, Path Testing, Control Structures Testing, Black Box Testing, Unit, Integration, Validation and System Testing, Software Maintenance, TQM Principals, Quality Control Tools (Q7 and M7), Product Development Life Cycle, Structured Development Methodology.
8. **Project Cost & Time Management:** Project Schedule, Activity Duration Estimation, Gantt Charts, Critical Path Method, PERT, Cost Control, Estimation Techniques.
9. **Trends In Software Engineering:** Reverse Engineering And Re-Engineering, Wrappers, Case Study of CASE Tools.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Major Specialization Groups

Specialization: Operations and Systems

Paper Code: MBA - 302 for Minor / MBA - 306 for Major

Subject: **Structured Systems Analysis & Designing**

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The course Objective is to introduce students to the fundamental concepts of Information Systems Analysis and Design. The course focus is on the study of Analysis and Design phases of the system development life cycle. Understanding of different software architectural styles. Understanding of implementation issues such as modularity and coding standards. Understanding of approaches to verification and validation.

Course Contents

1. **Basic Concepts:** Business System Concept, SDLC, Business Process Re-Engineering Concept, Problem Solving: Finding The Problem, Evaluating The Proposal, Economic Feasibility.
2. **System Requirement & Planning:** DFDS, Data Dictionaries, Process Organization & Interactions, Decision Analysis, Standards (IEEE/ISO), Data Modelling & Analysis, Entity Relationship Analysis– Decision Tables, Relational Analysis: Relations, Functional Dependencies, Relation Keys –Normal Form Relations, Constructing Relations from Functional Dependencies.
3. **Design:** File Design, Input-Output Design, Module Specification, User Interface Design.

4. **Object Modelling:** Hours & Objects Object Structure & Features, Concept of Object-Orient Approach, Object Representation Methods, Object Status, State Diagram.
5. **System Control & Assurance Of Quality:** Design Objectives Reliability & Maintenance, Software Design & Documentation Tools, Top-Down, Bottom-Up & Variants, Unit, Integration, System & Acceptance Testing, Audit Trials, Case Tools, System Controls.
6. **Hardware & Software Specification:** Selection of Software (OS, Languages, Preference & Acceptance Criteria), Selection of Hardware (Memory Process, Peripherals, Etc.).
7. **Planning:** Schedule Development, Resource Planning, Cost Estimation, Quality Planning, HR Planning, Communication Planning, Risk Management Planning, Procurement Planning, Project Management Methodology, Software Project Management Plan (SPMP), Changing Controls.
8. **Design:** Problem Portioning, Abstraction, Top-Down & Bottom-Up Strategies, Modularity, Coupling & Conension, Structure Chart, Transaction Analysis, Functional Approach Vs. Object Oriented Approach, Design Process, Design Concepts: Abstraction, Refinement, Modularity, Software Architecture.

VIDYASAGAR UNIVERSITY
MBA: THIRD SEMESTER
 (Effective from 2018-19)
Major Specialization Groups
Specialization: Operations and Systems
Paper Code: MBA - 307

Subject: Programming Languages and Computer Networking Principles

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The course Objective is to develop a greater understanding of the issues involved in programming language design and implementation. Develop an in-depth understanding of functional, logic, and object-oriented programming paradigms. Implement several programs and understand design/implementation issues involved with variable allocation and binding, control flow, types, subroutines, parameter passing. They will also Study the basic terminology of the computer networking and enumerate the layers of OSI model and TCP/IP model and will also acquire knowledge of Application layer and Presentation layer paradigms and protocols. Study Session layer design issues, Transport layer services, and protocols.

Course Contents

1. **Structured Programming:** Concept, Top-Down Analysis, Modular Programming, Structured Code; Algorithm: Different Ways of Stating Algorithms, Strategy for Designing Algorithms; Steps

in Developing a Program, Design Techniques, Programming Methodologies, Flow Charts, Pseudocode, Nassi-Shneiderman (NS) Diagrams.

2. **Concept Of Object Oriented Programming:** What is OOP, Procedural Language Vs. OOP, Advantages And Evolution of OOP, Java Programming, C++: Introduction, Data Encapsulation & Abstraction, Inheritance, Polymorphism, Stream Handling, Exception Handling, Data Types, Operators, and Expressions, Programming Structure, Functions, Pointers, Arrays & Strings, Structures & Unions, Hours and Objects, Constructors And Destructors, Operator Overloading and Type Conversion, Generic Programming with Templates.
3. **Concept Of Database:** DBMS, Client Server System, Relational Database Management System Through Oracle, Structured Query Language, Concept of On-Line Database Connectivity Graphic User Interface, Visual Basic.
4. **Computer Networking:** Introduction, Network Structure, The OSI Model, Network Topology, Network Protocols, Network Architecture, Networking Hardware and Software, Advantages and Limitations of Computer Networks, The TCP/IP Reference Model, the Internet, Connection Oriented Networks, Ethernet, Wireless Lans.
5. **Communication Channels:** Communication Networks, Local Networks, Managerial Issues Related To Telecommunications, Client/Server Computing, Communication Servers, Digital Networks, Electronic Data Interchange And Its Applications, Value Added Networks, Wireless Networks, Network Security, The Domain Name System, Electronic Mail, the World Wide Web.
6. **Basic Concept of Enterprise Resource Planning:** Concept, Meaning, Objectives, Scope.

7. Salemi, JOE, *Client/Server Databases*, Ziff- Davis Press.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Major Specialization Groups

Specialization: Operations and Systems

Paper Code: MBA - 308

Subject: Web Development of Internet Applications

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

In this course the students will begin to explore how to design and create websites by exploring the base language used to power all websites: HTML. The course will also able students to: identify and use various HTML tags; add an image to a webpage; create HTML-formatted tables; use hyperlinks to connect a series of WebPages; upload their finished HTML pages to a web host; and, learn some tips and tricks for styling pages and practice coding. The course enables students to master the development skill for both client-side and server-side programming, especially for database applications and other internet application.

Course Contents

- 1. Introduction To HTML:** Introduction to the Key Component of an HTML Document, Basic HTML Tags for the Www Document, Addition of Image in the Web Page, Hyperlinks Etc.
- 2. Legal, Ethical And Social Issues:** Internet Taxation, Online Privacy, Application of Traditional Law to the Internet, Impact of Traditional Law on E-Commerce, Limitation of Traditional Law With Regard of Internet, Internet Taxation.
- 3. Intermediate HTML:** Introduction to The List Items, Rows & Columns, Forms, Creation of Image Maps of Aid Hyperlink, Make the Webpage Accessible to the Search Engine.
- 4. Computer And Network Security:** Basic Security Concepts: Public / Private Key, Cryptography, Popular Security Protocol Such as SSL and SET, Digital Signature, Digital Certificate and Certification Authorities, Various Threats to Secure Systems Such as Virus, Spasm Etc., Introduction to Emerging Security Technique Such as Biometrics and Steganography.
- 5. H/W And S/W Communication:** Introduction to Some Communication Media and H/W Used to Connect The Computers On The Internet.
- 6. HTML Editors and ASP:** Introduction of Active Server Page, Introduction of Java Script / VB Script.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Retail Management

Paper Code: MBA - 301

Subject: Retail Management: Theory and Practice

Full Marks: 100

No. of Classes: 40 Hours 4 Credits

Course Objective

The objective of the course is to provide application based concepts of retail business in both Indian and Global context. However the readers will get more exposures on relation between the theories of retail and adequate examples from Indian scenario. Nowadays the competitive landscape of retail business is going through an interesting phase. Both Store based retailers and Electronic retailers are expanding their local business areas and from conventional kiranas, bazaars Indian retail too has started adopting the departmental store concepts. Therefore it is prudent now to have more inputs on retail management through theory and practical implications of theoretical aspects.

Course Contents

- 1. Retailing:** Definition, Scope, Benefits of Retailing, Evolution of Retailing: Theories; Changing Scenario of Indian Retail Industry, Trends in Retailing in India (Growth, Key Drivers), Functions of Retailing, Retail Institution, Classification and Formats, Concept of Organized and Unorganized Retail, Contribution of Organized Retail, Effects of Organized Retail, Influx of FDI, Virtual Retailing-An Overview.
- 2. Retail Customer And CRM:** Population Analysis, Demographic Analysis, Geographic Analysis, Consumer Buying Analysis, Process of Customer Engagement, Personal Selling, Role of IT In Driving CRM, E-Tailing, Retail Information System.
- 3. Retail Strategy and Store Location:** Situation Analysis, Identifying Strategic Options, Setting Objectives, Allocation of Resources, Develop and Implement the Strategy, Monitor, Review and Control, Strategic Focus for Competitive Advantage. Importance of Location Decision, Evaluation and Selection of Location.
- 4. Category Management:** Organizing the Buying Process by Categories, Assortment Planning Process-Variety, Assortment & Product Availability.
- 5. HR Policies and Franchising in Retail:** Introduction of Franchising, Franchise Operation, Factors of Growth, Manpower Planning, Development of Retail Personnel, Recognition, Reward System.
- 6. Pricing in Retailing:** Pricing Strategies: EDLP, High/Low Pricing, Pricing Bundling/Multiple Unit Pricing, Mark Downs and Mark Up, Establishing Gross Margins, Leader Pricing, Price Lining, Odd Pricing, Psychological Pricing, Premium Pricing, Penetration Pricing, VAT Calculation.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Retail Management

Paper Code: MBA - 302

Subject: Retail Merchandising Management

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The objective of the course is to provide various inputs regarding the retail merchandising through contents that are helpful to drive the overall decoration of both store and non-store retail. The concepts of merchandising and display are subjective and the attributes are keeps on changing. Merchandising management helps to interpret and adopt the principles of showcasing or display the products in more evasive and organised way. The concept can help to portray the merchandises exclusive and approachable through both electronic and store based retail.

Course Contents

1. **Merchandising-An Overview:** Definition, Scope, Benefits Of Merchandising, Merchandising Management, Rights Challenges, Factors Affecting Merchandising, Environment Affecting Merchandising, Opportunities for Merchandising.
2. **Merchandise Categories:** Fad/Fashion/Staple/Seasonal, Difference Among The Three Types, Concept of Fashion Retailing, Challenge of Fashion Retailing, Interpreting Consumer Demand, Fashion Purchase Selection Criteria, Fashion Retailing Business Format, Major Divisions/Departments in Fashion Retail Organization.
3. **Concept of Merchandiser and Buyer:** Function of Merchandiser Manager and Buyer, Hierarchy of Merchandiser and Buyer, Roles and Responsibilities.
4. **Merchandising Planning:**
 - I. Developing Sales Forecasting For Merchandising, Colour Forecasting, Fashion Scan, Merchandising Hierarchy;
 - II. Determination Merchandising Requirement, Merchandising Budget / Plan (Planned Retail to the Calculation of Gross Margin, B.O.M. and E.O.M., Measuring Inventory Level), Preparation of 6-Month Merchandising Plan: Consistency, Depth, Breadth;
 - III. Merchandising Control/ Regulation of the Plan (Open to Buy).

5. **Assortment Planning**: Range Planning, Space Planning, Space Transaction, GBB Assortment and Margin Mix, Aesthetic Minimum, Store Grading.
6. **Vendors Performance Analysis-Barrens Matrix**: Buying Merchandise, Source Selection and Evaluation, Receiving and Stocking Merchandise, Strategic Vendor Relationship Management, Resident Buying Office.
7. **Merchandising Performance Analysis**: Planogram, Visual Merchandising.

References:

1. Pradhan, Swapna, *Retail Management*
2. Bajaj, Chetan; Tuli, Rajnish and Srivastava, Nidhi, *Retail Management*

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Logistics and Supply Chain Management

Paper Code: MBA - 301

Subject: Materials Management

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

For understanding of modern Supply Chain Management a thorough comprehension of its previous avatar, namely, Materials Management is mandatory. Materials Management covers Purchasing Management, Inventory Control and Management, Material Handling along with Stores Management. Students are introduced to basic nuances of purchasing techniques encompassing supplier selection, management and development, inventory management techniques and stores management techniques. The course equips students with basic proficiency to take up roles in supplier management, stores and inventory management across verticals.

Course Contents

1. **Introduction to Materials Management**: Introduction, Scope of Materials Management, Importance of Materials Management, Scope of Profitability through MM, Primary and Secondary Objectives of MM, Integrated Materials Management: Relation with Other Functions, Materials Management to Supply Chain Management-The Transition.
2. **Purchasing Management**: Overview, Purchasing Organizations, Purchasing Cycle and Contracts / Purchase Orders, Lead Time, Vendor Analysis & Management, Negotiations, Scope of Cost Reduction in Purchasing, Make or Buy, Purchasing Productivity.
3. **Inventory Management**: Importance, Scope of Inventory Control, Types of Inventory, Work in Process Inventories, Finished Goods Inventories, Spare Parts Inventories, Costs Associated with

Inventory, Inventory Control, Selective Inventory Control, FSN, VED, ABC, Economic Order Quantity, Safety Stocks, Inventory Management Systems, Forecasting Techniques, Material Requirement Planning.

4. **Stores Management & Surplus, Obsolete and Scrap Management:** Materials Identification: Classifying Materials, Codification of Materials, Standardization: Simplification and Variety Reduction of Materials, Stores Management: Different Types of Stores, Stores Issues and Receipts: Procedures, Forms, Policies in Stores Transactions: Stores Accounting, Stores Organization, Materials Safety and Security, Store Layout and Design, Introduction to Material Handling Equipments, General Duties and Responsibilities of Stores Management, Stores Productivity.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Logistics and Supply Chain Management

Paper Code: MBA - 302

Subject: Logistics, Transport and Supply Chain Management

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

Supply chain management (SCM) is assortment of wide-ranging actions required to plan, control and execute a product's flow, from securing raw materials and production through distribution to the final customer, in the most streamlined and cost-effective way possible. LS302 acquaints students with basic Supply Chain concepts including modern advances along with transportation dynamics which would enable to take up entry level roles in Supply Chain Management and Transportation Management across verticals. At the academic/education level, the course provides those majoring in Marketing a more realistic and grounded dimension to their learning by underscoring the other side of the business interface. In a business world, wherein services are expanding at a rapid base, students are also introduced to the challenges of Service Supply Chain.

Course Contents

1. **Backdrop:** Globalization and Its impact on Supply Chains and Its Management.

2. **Supply Chains**: Concept, Framework and Modelling, Relationships, Drivers, Implementation and Changing Paradigm, Supply Chain Flows: Material, Information and Cash.
3. **Challenges and Hazards in Managing Supply Chains**: Bullwhip Effect, Shortage Gaming, Dealer and Data Management.
4. **Creating Value through Supplier Relationships**: CRM-SCM Interface.
5. **Contracts and E-Contracts Management**: Importance and Trends.
6. **JIT & TOM-SCM Interface**: Concept, Scope and Challenges -Indian Context.
7. **Transportation Logistics**: Strategic Objectives of Transport, Types of Modes, Characteristics and Salient Features, Intermodal Transportation in International Operations, Factors Influencing Mode and Carrier Selection Decision, Basics of 3PL and 4 PL.
8. **E-Procurement and E-Commerce Applications**: Scope, Applications and Challenges.
9. **Bar Coding, RFID and other Tracking Mechanisms**: Applications and Challenges.
10. **Reverse Logistics**: Scope, Applications, CSR and Challenges.
11. **Supply Chain/Logistics Audit**: Scope, Applications and Limitations.
12. **Service Supply Chain Management**: Challenges.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Media Management

Paper Code: MBA - 301

Subject: Media Planning & Organization

Full Marks: 100

No. of Classes: 40 Hours 4 Credits

Course Objective

Media Planning is a science of tracking and placing advertisements in various media. The Subject is designed to give an idea about the total Media Planning Process starting from the beginning like what is media to selection of a media for promotion of a particular product/service. Also to understand the best media mix for the products/service, the Organisations and it's various Strategy.

Course Contents

- 1. Introduction To Media Planning:** Media: Definition, Types of Media: T.V., Radio, Print, OOH, Interactive, Advantages and Disadvantages; Characteristics of Media, Media Selection Procedure: Audience Measure, Reach & Media Planning, Frequency & Media Planning, Cost Efficiency as Planning Dimension.
- 2. Developing Media Strategies:** Setting Media Objectives, Target Audience Strategies, Timing & Duration Strategies, Background & Situation Analysis, Media Objectives, Strategy: Selection of Media, The Flow Chart: Scheduling & Budgeting Allocation.
- 3. Buying Media Space & Time:** Media Buying Functions, Buying Space in Print Media, Buying Radio Time, Buying Television Time, Buying New Media, Ability of Media Buyers, Changes in Media Buying.
- 4. Ownership Pattern:** Different Ownership Pattern & Their Advantages & Disadvantages, Organisational Structure: Print Media, Interactive Media, Doordarshan, AD Agency.
- 5. Organizational Structure of Private Infotainment Channel:** Different Formats: Telecasting, Partnership Model, Policy & Ethics, Planning & Production, Different News Format, Capsule-Writing, Editing & Execution.
- 6. Satellite Channel:** Launching Format, Technical Aspects, Aesthetics.

VIDYASAGAR UNIVERSITY
MBA: THIRD SEMESTER
(Effective from 2018-19)
Minor Specialization Groups
Specialization: Media Management
Paper Code: MBA - 302

Subject: Media Promotion and New Media

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

Media Promotion & new media subject is designed to give an idea regarding various Media Promotions Process, advertisements & selling policies are used in the Marketing Industry. New Media is the advanced tools of Promotion for reaching more people. The subject also gives an idea to students regarding the New Media Industry and the usage of social media for Promotion and Marketing.

Course Contents

1. **Promotion:** Role of Promotion, Promotion Society, Promotion Communication Process, Promotional Mix: Differences, Advantages, Disadvantages.
2. **Publicity Preview:** Publicity Advertising Compared, Dealing With Unfavourable Publicity, Limitation of Using Publicity, Preparation of Press-Kit.
3. **Advertisement Promotion:** Definition of Advertisement, Advertisement Objectives, Types of Advertisement, Advertising Segments, Effect of Advertising on Market Share & Consumers, Creative Brief, Creative Decisions of Advertising Campaign, Successful Television Advertisement, Advertising Campaign: Theory & Practice, Evaluating an Advertising Plan, Analysis of Case Studies.
4. **Introduction To New Media:** New Media: Concept, Traditional Media, Difference Between New and Traditional Media, Rise of Internet, New Media and Social Media, Virtual Space or Cyber Space, Cyber Culture, Cyber Journalism, Digital Divide, Convergence: Web Sites, E-Newspaper, Internet TV, Internet Radio.
5. **Conceptualizing Websites:** Components of a Website, Web Layout, Aesthetics for Online Portals: Design, Layout, Colour, Graphics, Visual Information, Types of Websites, Writing and Design for Online Medium, Interactivity of Form and Content in New Media, Linear Writing vs. Interactive Writing, Grammar of Interactivity, Multimedia Storytelling, Hypertext Fiction.
6. **Business/Governance and Social Media:** E-Commerce, Consumer Societies and New Media, Globalization and New Media, E-Governance: Potentials And Criticism with Reference to India, Blogs, Wiki, RSS Feeds, Cell Phones SMS, Social Networking Sites.

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Pharma Management

Paper Code: MBA - 301

Subject: Bio-Pharma and Immunology

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The course would facilitate the students to gain in depth knowledge about immunology in reference to health and diagnostics. After studying this course, students would have deeper understanding of cell at structural and functional level, molecular interaction between cells, signal transduction, secondary messengers. This course will cover the topics of biopharmaceutics and bioavailability of drugs and will equip students to learn and apply the mechanism of drug action and pharmacokinetics of a given drug.

Course Contents

1. **Overview of the Immune System:** Antigens, Antibodies and Haptens; Immune System, Cellular and Humoral Immunity, Immunological Tolerance; Antigen-Antibody Reactions and Their Applications, Hypersensitivity; Active and Passive Immunization, Preparation, Standardization and Storage of Immunological Products.
2. **Infection:** Types, Factors Influencing Infection and Harmful Microbial Products Such as Exotoxins and Endotoxins; Leukocidins, Hemolysins, Fibrinolysins, Proof of Pathogenicity and Course of Infection, Sources of Infectious Agents and Their Carriers Portals of Entry, Immunosuppression.
3. **Genetic Code and Protein Synthesis:** Genetic Code, Components of Protein Synthesis, Inhibition of Protein Synthesis, Brief Account of Protein Engineering and Polymerase Chain Reactions, Regulation of Gene Expression, Genetic Code & Protein Synthesis: Concept of Central Dogma, Components of Replication and Transcription.
4. **Immune System in Health and Disease:** Leukocyte Migration and Inflammation, Hypersensitive Reactions, Immune Response to Infection Diseases Vaccines.
5. **Biopharmaceutics:** Introduction, Fate of Drug after Administration, Blood Level Curves, Routes of Drug Administration, Drug Absorption and Disposition, Significance in Product, Formulation and Development, Drug Absorption, Structure of Biological Membrane, Drug Transport Mechanisms, Factors and Kinetics Involved, Physico-Chemical and Biological Factors Involved in Drug Absorption.
6. **Bioavailability:** Objectives and Consideration in Bioavailability Studies, Bioavailability of Oral and Non-Oral Dosage Forms, Concept of Equivalence, Measurement of Bioavailability, Determination of the Rate of Absorption, Bioequivalence Protocol and Its Importance.

7. **Protein Binding:** Theory of Plasma Protein Binding and Implications, Factors Influencing Protein Binding, Effect of Binding on Drug Pharmacokinetics

VIDYASAGAR UNIVERSITY

MBA: THIRD SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Pharma Management

Paper Code: MBA - 302

Subject: Pharma Marketing

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The course would facilitate the students to understand the rapid strides and the winds of change in pharmaceutical industry, globalisation and liberalisation is fast penetrating into the industry. After studying this course, students would be able to describe, classify structure and combine concepts, theories, methods and models taught Identify and develop relevant issues within pharmaceutical marketing ,analyze and synthesise specific issues within pharmaceutical marketing by using the concepts, theories, methods and models taught ,assess and communicate problem-solving on a reflective, scientific basis.

Course Contents

1. **Marketing Principles:** Marketing in the Twenty First Century, General Principles of Marketing, Including Needs, Wants, Demand, and Value.
2. **Product Management:** Scope, Parameters of Product Management, Roles of a Product Manager, Product Life Cycle, New Product Launch and Strategies for Promotion, Product Branding, Packaging and Labeling Decisions
3. **Emerging Concepts in Marketing:** Vertical & Horizontal Marketing, Rural Marketing; Consumerism, Industrial Marketing, Global Marketing.
4. **Introduction to Pharmaceutical Marketing:** Study of Different Parameters in Pharmaceutical Market, Identification of Pharmaceutical Market, Market Behaviour; Physician Prescribing Habits, Patient Motivation, Market Analysis.
5. **4 P's With Respect to Pharmaceuticals:** Product-Products in the Pharmaceutical Industry Price, Pharmaceuticals & Pricing; Place, The Pharmaceutical Industry Supply Chain; Promotion, Promotional Marketing Activities & Practices.
6. **The Pharmaceutical Products:** Drug Development and Marketing Research Interface, Diversification and Specialization, Marketing Generic Drugs, Non-Prescription Drugs.

7. **Issues Unique to Pharmaceutical Marketing:** Differentiating the Marketing Focuses between Prescription and Over-The-Counter Medications and Brand and Generic Medications.

Major Specialization Groups
Specialization: Finance

Paper Code: MBA- 401 for Minor / MBA- 402 for Major
Subject: International Financial Management
Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The objective of this course is to provide the students an overall view of the international financial system and how multinational corporations operate. This course is concerned with the financial management of the firms that operate in the increasingly globalized business

environment. Emphasizing broad concepts and real-world practices rather than extensive quantitative material, the course offers a concise introduction to international finance and provides a clear, conceptual framework for analyzing key financial decisions in multinational firms. The approach of the course is to treat international financial management as a natural and logical extension of the principles learned in the introductory financial management course.

Course Contents

- 1. Introduction:** International Financial Management (IFM): Nature, Importance, Scope; IFM Vs. Domestic Financial Management, Overview of Global Financial Environment
- 2. International Monetary System:** Exchange Rate Regimes, IMF, Euro Currency Market, EURO Market; Role of Finance Manager in Global context; Balance of Payments: Understandings, Analysis & Interpretation.
- 3. Foreign Exchange Market:** Nature, Structure, Types of Transactions, Exchange Rate Quotation, Spot & Forward, Nominal, Real, and Effective Exchange Rates, Foreign Exchange Market in India: Nature, Structure, Operations & Limitations; Exchange Rate Determination: Structural Models of Exchange Rate Determination.
- 4. Foreign Exchange Risk:** Exposure: Types of Risk; Risk management Process.
- 5. Market for Forward Contracts:** Features, Arbitrage, Pay Off Profile.
- 6. Markets for Currency Futures:** Currency Futures: Features, Futures Vs. Forward Contracts, Hedging, Speculation, Pay Off Profile.
- 7. Markets for Currency Options:** Currency Options, Features, Terminologies, Gains and Losses, Pricing, Hedging, Speculation, Pay Off Profile.
- 8. International Investment Decisions:** International Capital Budgeting, Evaluation Criteria, Cash Flow, Cost of Capital, Adjusted Present Value Approach, Sensitivity Analysis, Real Options and Project Appraisal, Non-Financial Factors.
- 9. International Financing Decisions:** International Banking, Process, Intermediary Function, Direction and Purposes of Lending, Lending Risk, Credit Creation Function, Control of International Banks.
- 10. International Working Capital Management:** Working Capital Policy, Basics of Managing Cash and Near-Cash Assets: Steps, Management of Receivables, Management of Inventory.

VIDYASAGAR UNIVERSITY
MBA: Fourth SEMESTER
(Effective from 2020-21)
Major Specialization Groups
Specialization: MBA: Business Data Analytics & Data Science
Paper Code: MBA- 401 for Minor /MBA- 402 for Major
Subject : Big Data & SQL
Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- To know about application of advanced SQL in data analytics
- To understand the concept of Big data
- To know about Hadoop and identifying the core components of Hadoop
- To learn about big data architecture and pattern
- To develop knowledge on Spark Map Transformation

Course Contents

1. **Advanced SQL:** Introduction, Getting started with virtual labs, handling multiple rows for single record, consolidating multiple results, Caching your views, Linked servers, Collation incompatibilities, Catching errors, Base 64 encoding & decoding.

2. **Data Analytics in SQL:**Advanced SQL, Data Analysis Using SQL, Assignment – SQL, Selecting columns, Filtering rows, Aggregate function, Sorting groups & joins.
3. **Introduction to Big Data:** Introduction to Big Data, Need for Big Data, Big Data Storage and Processing Framework – Hadoop.
4. **Big Data Processing Framework :**Introduction to Hadoop, Hadoop configuration, Apache Hadoop core components, Hadoop core components – HDFS, Hadoop installation - prerequisites, Hadoop Multi-node installation.
5. **Big Ingestion & Processing:**Big data architecture & pattern, Data ignition layer, Data collector layer, Data processing layer, Data storage layer, Data Query Layer, Data visualization Layer, Data visualization Layer.
6. **Big Data processing using Apache Spark :** Apache Spark Introduction & architecture deep dive, Working with text files to create Resilient Distributed Datasets (RDD) in Spark, Understanding the partitioning & distributed nature of RDD in Spark, Developing mastery in Spark Map Transformation & Lazy DAG execution model, Using Map transformation on Real world big data Retail Analysis, Developing mastery on spark filter transformation, Developing mastery in RDD of Scala collection, NYC Parking Case Study.

VIDYASAGAR UNIVERSITY
MBA: Fourth SEMESTER
 (Effective from 2020-21)
Major Specialization Groups
Specialization: MBA: Business Data Analytics & Data Science
Paper Code: MBA- 403 for Major
Subject : Introduction to Data Visualization with Tableau
Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objectives

- To understand the process of data analysis and visualization of data
- To understand the tools to monitor resources and manage content
- To develop the ability to create dashboard
- To learn Geo coding and mapping in Tableau

- To develop the ability to integrate R with Spark & Hadoop for large scale data analytics

Course Contents

1. **The Visualization Design** : Data Visualization with Tableau Specialization, Data visualization and D3.js, Python for Data Analysis and Visualization, D3.js Data Visualization Fundamentals, How to Process, Analyze and Visualize Data. Motion Chart, Motion Chart, Bump Chart, Donut Chart, Waterfall Chart, Pareto Chart, Introducing R programme in Tableau.
2. **Data Organization & Scripting** : Tools to monitor resources and manage content, External repository hosting and node optimization to improve scalability, AWS key management integration to enhance security, Custom R and Python scripts in Tableau Prep.
3. **Dashboard - Building/ Layout & Formatting/ Interactivity**: Dashboard size options, How to set overall dashboard size, How to use group items using layout containers, Layout container types, How to add a layout container, How to evenly distribute a layout container's team, How to format a layout container .
4. **Geo-coding & mapping in Tableau**: Geocoding in Tableau, Importing custom geocoding in Tableau, Using custom graphic units in map, Replacing Tableau's standard map
5. **Hands-on Working with Data** : Understand the R programming language and its ecosystem of packages for data science, Obtain and clean your data before processing, Master essential exploratory techniques for summarizing data, Examine various machine learning prediction, models, Explore the H2O analytics platform in R for deep learning, Apply data mining techniques to available datasets, Work with interactive visualization packages in R, Integrate R with Spark and Hadoop for large-scale data analytics.
6. **Integrating Tableau with R** : What is R Studio, Installing R & R Studio, Setting Up Tableau Desktop with R, Configure an Reserve Connection on Tableau, Pass Expressions to R, R Functions in Tableau, Run an R script on Tableau8a

VIDYASAGAR UNIVERSITY

MBA: FOURTH SEMESTER

(Effective from 2018-19)

Major Specialization Groups

Specialization: Operations and Systems Management

Paper Code: MBA- 403

Subject: Information Technology Enabled Services

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The objective of the course is to make the students explore the services of I.T.E.S, and also measure the scope for applications of I.T.E.S in promoting Services Marketing. It will also develop the understanding of Information Technology that enables the business by improving the quality of service. ITeS is also called web-enabled services or remote services that cover the entire operations which exploit Information Technology for improving the efficiency of an organisation and also evaluate the Elements of Promotion of Services. The overall objective of this course is to produce highly trained, qualified and globally competitive certificate level human resource for absorption into various sectors.

Course Contents

1. **Introduction to IT Enabled Services:** Meaning of IT Enabled Services, Users of IT Enabled Services, Technology Involved, Deployment Issues in Establishment of IT Enabled Services, Medical, Legal, E-Banking, E-Business.

2. **Environment Scanning and Competitiveness of IT and ITES Industry:** The Global IT and ITES Industry, Overview of India's IT and ITES Industry, IT Services (ITES/BPO Engineering Services, R&D, and Software Products).
3. **Current Employment in the IT and ITES industry:** Newly Emerging Area and Requirement of IT Enabled Service Sector.
4. **Skill Development in the IT Industry:** Value Chain in the IT industry, Skills Required and Skill Gaps in the IT Industry, Format and Transcribe a Variety of Law Office Documents, Knowledge of a Variety of Legal Forms and Documents including Letters, Memos, Briefs, Pleadings, Agendas, Transcripts, Reports, Delivery Skill Requirements and Skill Gaps Specific to Pre-Sales and Business Analysis, Major Trends Impacting Skill Requirements for the IT Industry.
5. **ITES in Medical Field:** Medical Transcription and Editing, Medical Terminology, Transcribe All Forms of Medical Reports, Laboratory, Data, Diagnostic Assessments, and Health Records, Medical Records Management: (Understanding Medical Records, Model Report Forms)
6. **IT Law:** An Overview of Indian IT Law, Introduction to Indian Legal System, Understanding of IT Law, IT Act, 2000 with Amendments, Scope, Electronic Signature, Offences and Punishment under the Act.
7. **Industry Oriented Human Resource Requirement:** Outlook of the IT and ITES Industry.

MBA: FOURTH SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Logistics and Supply Chain Management

Paper Code: MBA- 401

Subject: E-Logistics

Full Marks: 100

No. of Classes: 40 Hours

4 Credits

Course Objective

In the information age, Supply Chain and Logistics are greatly influenced by advances of information technology. It is imperative for practitioners to be acquainted to basic nuances of technology applications in the function to take up appropriate roles. LS401 takes a comprehensive look at the subject incorporating E-Commerce, E-Security etc along with interfacing areas like E-banking. The course endeavors to familiarize students with modern day technology applications so as to enable them to perform their roles in industry with greater effectiveness. At the academic/education level, marketing and other majors would value add on their business knowledge and acumen through the exposures to E-Commerce, E-Banking and E-Security.

Course Contents

1. **Role and Importance of IT in Logistics, Transportation and Supply Chain Management:** IT Solutions for Supply Chain Management, Supply Chain Information Technology in Practice, - IT as an Enabler/Driver of SCM.
2. **Overview of E – Commerce:** Internet, Intranet, Extranet, Definition, Goals of E- Commerce, Difference between E-Commerce and E- Business, Models of E- Commerce, Limitations and Advantages of E-Commerce, Entrepreneurial Opportunities and Boom.
3. **E-Banking and Its Importance in E-Logistics:** Transactions: Inter Banking, Intra Banking, Electronic Payments, (Payment - Gateway Example), Securities in E-banking (SSL - Digital Signatures – Examples), Services Provided: ATM, Smart Card, ECS (Electronic Clearing System), NEFT & RTGS.
4. **E- Security:** Hazards of E-Transactions, Firewalls, Electronic Market / e- shop, Introduction to Security, Types of Securities, Security Tools, Network Security.
5. **IT and Project Management:** E-learning, Models, Video Conferencing, Building Online Community, Virtual Office and Management.
6. **Core Issues in E – Logistics:** Logistics & Supplier Chain Management, Warehousing Management, Transportation/Distribution Management.
7. **Enterprise Resource Planning (ERP):** Introduction, Need, Advantages, Growth, ERP Vendors.
8. **ERP and Related Technologies and Implementation:** Business Process Reengineering (BPR), Management Information System (MIS), Decision Support Systems (DSS), Basics of Implementation.

VIDYASAGAR UNIVERSITY

MBA: FOURTH SEMESTER

(Effective from 2018-19)

Minor Specialization Groups

Specialization: Pharma Management

Paper Code: MBA- 401

Subject: Pharmacology and Drug Regulatory Affairs

Full Marks: 100 No. of Classes: 40 Hours 4 Credits

Course Objective

The course will explain the regulatory framework for controlling and managing drug development and describe risk assessment methods used in the drug development process. The course will equip students to understand the therapeutic mode of action, and structural considerations of different classes of biopharmaceutical agent and will give in depth knowledge about the current regulatory acts and safety norms of the modern pharmaceutical industries.

Course Contents

1. **General Pharmacology:** Introduction to Pharmacology, Sources of Drugs, Dosage Forms and Routes of Administration, Mechanism of Action, Combined Effect of Drugs, Factors Modifying Drug Action, Tolerance and Dependence, Pharmacokinetics: Absorption, Distribution, Metabolism and Excretion of Drugs, Drug Addition & Drug Abuse, New Drug Development.
2. **Pharmacology of Drugs Acting on Central Nervous System and Pharmacology of Drugs Acting on Cardiovascular System:** Neurohumoral Transmission in the C.N.S, General Anesthetics and Local

Anaesthetics, Sedatives, Hypnotics, Anti-epileptics Drugs, Analgesics, Antipyretics, Anti-inflammatory and Anti-gout Drugs, Narcotic Analgesics and Antagonists, Psychopharmacological Agents, Antipsychotics (Neuroleptic drugs), Antidepressants, Psychomimetics, Anti-parkinsonian Drugs - Digitalis and Cardiac Glycosides, Antihypertensive Drugs, Antianginal and Vasodilator Drugs, Antiarrhythmic Drugs.

3. **Drugs Acting on the Haemopoetic System**: Haematinics, Anticoagulants, Fibrinolytic and Anti-Platelet Drugs, Vitamin K and Haemostatic Agents.

**VIDYASAGAR UNIVERSITY
MBA: FOURTH SEMESTER**

(Effective from 2018-19)

Common Papers

Full Marks: 100 Paper Code: MBA- 406

Subject: Business Plan Development 4 Credits

Course Objective

Business planning is an essential component of successful business management. This course will help the students to formulate strategic plan for unforeseen events as well as new competitors that enter the marketplace. It is necessary for business owners to create a set of planning objectives that effectively outline how the business will be run, potential risk factors and effective marketing strategies. It will enhance the entrepreneurial mindset of the management students.

Students will submit their individual business plan. There shall be **Internal Evaluation** of the Business Plans.

VIDYASAGAR UNIVERSITY
MBA: FOURTH SEMESTER
(Effective from 2018-19)
Common Papers
Paper Code: MBA- 407
Subject: Dissertation (equivalent to One Paper)
Full Marks: 100 4 Credits

Course Objective

The dissertation course is an opportunity for students to carry out an independent - though supervised - applied research project. The purpose of the dissertation is to develop students' ability to apply their business knowledge and skills to address a business problem.

It is a common Compulsory Paper for all Specialisation Groups. Every student has to prepare a Dissertation Report under the supervision of any internal faculty member. The Dissertation Reports will be sent for externally evaluation.

VIDYASAGAR UNIVERSITY
MBA: FOURTH SEMESTER
(Effective from 2018-19)
Common Papers
Paper Code: MBA - 408
Subject: Grand Viva (equivalent to One Paper)
Full Marks: 100 4 Credits

Course Objective

The objective of the course is to evaluate the overall assessment of the students. Examiners raise some pertinent questions to the students from their area of specializations and evaluate their verbal defense.

It is a common Compulsory Paper for all Specialisation Groups. Grand Viva will be conducted by a Board of Examiners to be decided by the Board of Studies. Board of Examiners will consist of all the internal teachers and external teachers chosen from different specialization areas.
